

## What are the expectations of the European Commission towards the UNISECO H2020 project?

- video transcript -

### Gaëtan Dubois from the DG AGRI, the Research and Innovation Unit answers

“UNISECO is one of the two projects with LIFT that won the Topic Call on socio-economics and ecological approaches.

Ecological approaches are something that has been clearly highlighted in the agriculture research strategy that we developed in DG Agri some years ago.

It is really something that we are willing to dig in to look further on socio-economics and farmers that are involved in ecological approaches, so this farm economic dimension.

So, the kick-off meeting is now ending, and I think it is a very good and nice start. A lot of work has now to be done.

I wish good luck to the Team of UNISECO, and we expect good results that could be valorised on the policy but also on the market level.”
